Classification of output reads
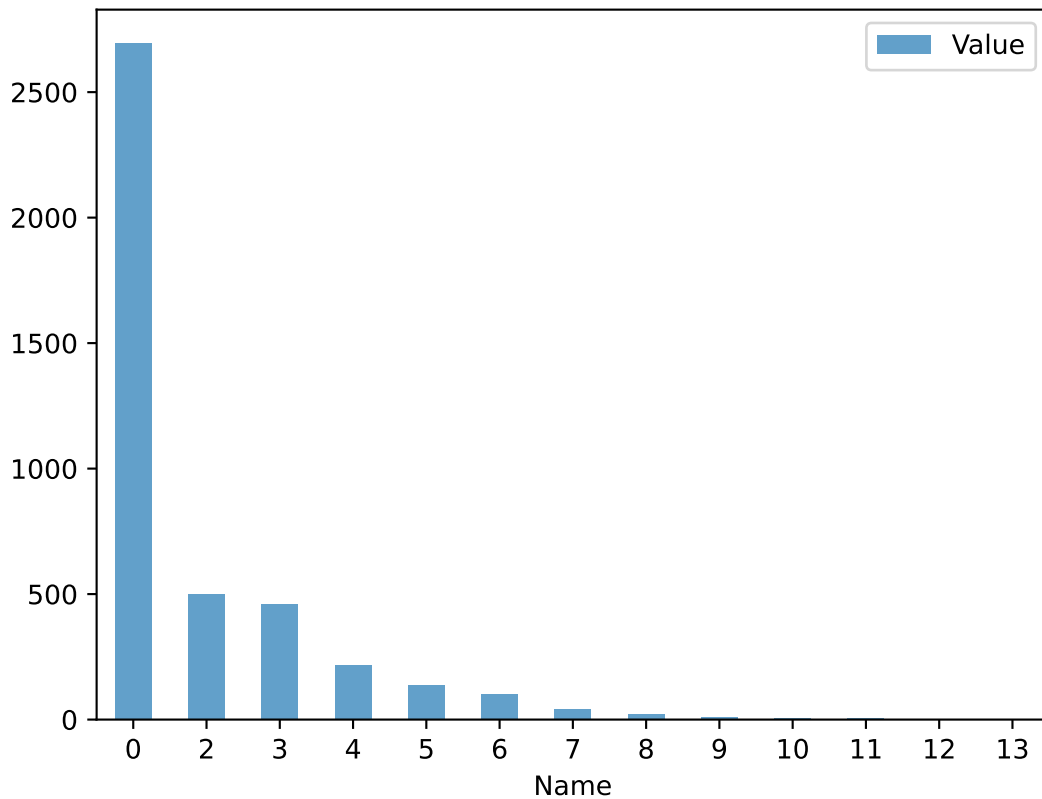

Strand of oriented reads

Strand of rescued reads

	+	-
	255	257
	49.8%	50.2%

Value

Number of hits in unclassified reads

Number of hits in rescued reads

Number of usable segments per rescued read

Usable bases as function of cutoff(q). Best q=0.5172

Log10 length distribution of trimmed away sequences.
